Mr. Dan Leavitt  
Deputy Director  
California High-Speed Rail Authority  
925 L Street, Suite 1425  
Sacramento, CA 95814

**Subject: Corona Chamber Supports Alternative Technical Working Group (TWG)  
Alignment of California High-Speed Train System**

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

925 L Street, Suite 1425  
Sacramento, CA 95814

**Subject: Corona Chamber Supports Alternative Technical Working Group (TWG)  
Alignment of California High-Speed Train System**

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

**Subject: Corona Chamber Supports Alternative Technical Working Group (TWG)  
Alignment of California High-Speed Train System**

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

**FOR IMMEDIATE RELEASE:**

## **BizTalk Blender® — Why It's So Good For Chambers And Quality Networking**

Reno, Nevada – **September 3, 2009** - Increased competition in the local market combined with the economic downturn has made doing business a little harder these days. Time translates into dollars and dollars are becoming more and more scarce. As a result businesses are hungry to seek new ways to effectively reach contacts for qualified leads.

Chambers can gather large numbers of business owners for several hours of undivided attention. But what is done with that undivided attention is key. And this is exactly what prompted Alice Heiman of Alice Heiman LLC to develop the BizTalk Blender®, a proactive method of networking that deviates from the status quo of typical mixers.

“I wanted to maximize the time people spent interacting at mixer functions and BizTalk Blender® is a fully self-contained product that can accomplish that goal,” said Heiman.

BizTalk Blender® offers a more effective alternative to networking that among many of its features provides a list of attendees in advance so that strategic meetings can be pre-determined and pre-arranged. There is no speaker and no sitting. It is a fun, comfortable event where everyone keeps moving and meeting new people.

And for those members who need help in “breaking the ice”, suggestions are available on how to approach new people. But most significantly, one of the greatest aspects of the BizTalk Blender® is the time allocated for business conversation so members get to share business ideas instead of self-promoting their products.

“I wanted to tell you how much I enjoyed the BizTalk Blender®. It was phenomenal. I was so impressed with the people there as well as the booths that were set up. It's so nice to be able to attend a function and simply network. You're onto something and I can't wait for the next one!!” said, Lisa Cooke of Send Out Cards

Clearly, BizTalk Blender® is a product that will empower chambers with the tools to give their members a more effective means of communication and most importantly, the contacts they need to do business.

It's an altogether different concept of networking, says Heiman. “One that in today's economic climate is what business people want most from their efforts”.

Chambers offering a BizTalk Blender® as part of their membership package might not only increase membership, but could quite possibly increase attendance to chamber mixers that may not have been maximized in previous events. It is a way to continually re-enforce the value of chamber membership each time a BizTalk Blender® is hosted.

After perfecting it locally for over 2 years, Alice launched her idea at the US Chamber of Commerce Small Business Summit in Washington DC in May. She got a great reception

from the chambers. Now she is launching it nationwide by inviting them to enter in a contest to win a free license and training to run BizTalk Blenders® at their chamber for 1 year, valued \$2,000. BizTalk Blenders® are such a big hit locally, two of the local chambers are interested and here is what people are saying.

Mike Haro, owner of the Self Coaching Center, told Heiman, that the BizTalkBlender® was the best networking opportunity he's attended since coming to Reno. "It was such an easy, exciting, and comfortable interactive evening."

Suzanne Stock, Business and Development Consultant, sent this to Heiman after the event, "Thank you for the Biz Blender® last week- I'm so glad that I attended. I've been to so many networking meetings and functions over the last couple of months- and I must say this one was the most fun, and the most productive one of all."

You can learn more about the BizTalk Blender® at [www.biztalkblender.com](http://www.biztalkblender.com) and if you are a chamber you can enter to win.

Alice Heiman LLC and her team help companies grow by working with CEOs and senior sales executives. They deliver results by using a unique combination of experience in sales, sales management, marketing, process implementation and facilitation to provide the strategy and tactics for companies to increase their sales.

The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

**Subject: Corona Chamber Supports Alternative Technical Working Group (TWG)  
Alignment of California High-Speed Train System**

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Julie Goodson

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Judi Staats  
Economic Development Manager

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Nelson Nelson  
Assistant Public Works Director  
City of Corona

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Sherrie Rodriguez

**Subject:** Corona Chamber Supports Alternative Technical Working Group (TWG)  
Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for a alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Name: Scott Widdell

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

John Springer

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Sacramento, CA 95814

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Cindy Bevis  
Safety Director

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

Corona is the Inland Empires gateway for thousands to OC and LA, as well as a main touchpoint on the way to such as venues as San Francisco, Las Vegas, Laughlin, Arizona, San Diego and Mexico. It MUST be included in ANY high speed rail plans.

The proposed alternative line is critical to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

Specifically to Mr. Pringle: I voted for you the first time you ran for office; still call the jar-top twist off tool 'Curt Pringles.' I trust you to represent our interests with vigor as you did 20 years ago.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Roberta Tandy

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Cindy Johnson

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

brian chacone

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Steven Ortiz

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

As a resident of Lake Elsinore and employee of the City of Corona, I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona, as well as I hope in Lake Elsinore. It has been extremely frustrating to try to find alternative transportation as there is only one bus line between the two cities, and it's sole purpose is to meet the Metrolink train, which departs Corona far earlier than I'm scheduled to be at work.

The proposed alternative line would be beneficial to all of us as it would create jobs and eventually improve health of our residents through reduction of traffic on the I-15 through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Cecilia Vest

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

Lucinda Sanchez

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community. I currently work in Corona and commute from Murrieta. My company has employees that reside in Lake Elsinore and Temecula as well. The dreaded commute on I-15 hinders retention of good employees who are tired of fighting the traffic every day.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Subject: Corona Chamber Supports Alternative Technical Working Group (TWG) Alignment of California High-Speed Train System

Dear Mr. Dan Leavitt:

I support the California High-Speed Rail Train System and urge your support for the Technical Working Group's (TWG) alternative route along the I-15 freeway with a proposed station located in the City of Corona.

The proposed alternative line would be beneficial to our business community and surrounding residential communities. The I-15 freeway continues to undergo numerous improvements for increased traffic flow as it remains the primary artery for goods and the movement of people from Orange County through Corona to our neighboring cities such as Lake Elsinore, Murrieta and Temecula. The need for alternative transportation has never been more apparent in our community.

The High Speed Rail Train System will not only help bring California into the future of transportation but the Cities that the system will move through. I respectfully urge your support of a high speed train line through Corona.

Thank you.

Sincerely,

kevin toohey
